ROOF-540TM

Premium quality waterproofing systems,
for virtually any kind of roofs.

Color, hue, tint, shade & tone variations will exist between color samples & actual products manufactured or applied on site. This can be due to color samples, product age, pigment & raw material variations, lightning and texture conditions, as well as other factors. Every effort will made to keep color variations to a minimum and within acceptable coating industry standards. However, no guarantee is made in this regard whatsoever.
